Powerline Adapter 200Mbps with power outlet - Starterkit

Create your own home network over the existing power lines and retain your power outlet!

Article number	EM8019
EAN code	8716065281903
Master carton	0
Casepack	0

OVERVIEW

- Internet in every room, simply through the wall outlet
- Integrated Noise filtered power outlet
- Set of 2 Powerline adapters for super-speed (200Mbps) Ethernet over existing power lines
- Stable connection, no hassle with wires
- Security through 128-Bit AES Link encryption
- Easy installation
- Multilingual user manual
- Accessible helpdesk
- 5-Year warranty

TECHNICAL SPECIFICATIONS

- Data transfer speed: 200Mbps (maximum under optimal conditions)
- Standardization: IEEE802.3 and IEEE802.3u Ethernet
- Encryption: 128-bit AES link encryption with key management
- Interfaces: Ethernet RJ45 (MDI/MDI-X), powerline over Power Plug connector
- Access Methods: Priority-based CSMA/CA channel access schemes maximize efficiency and throughput
- Quality of Service: four-level priority based connection access, and multi segment bursting
- Power outlet : 1 noise filtered power outlet
- Max.Powerline adapters in network: 6

SYSTEM REQUIREMENTS

- Installed networking adapter

Isn't it great to have your own home network? An ideal situation, but it is often hard to realize. You have to drill holes, draw cabling in place and do all sorts of things you don't want to. Eminent offers a completely different approach! With the EM8019 you have a home network over the only existing network in your house. The network that has offered its services for many years now and probably has never let you down: the mains!

This system is as easy as it seems! Connect your modem to the wall outlet by using a Powerline adapter. Then you connect your computer to another wall outlet by using a second Powerline adapter and presto: Internet! The starter kit consists of two adapters, so that you can start right away. Use the extension kit to connect even more computers to your network.

Read on, because the best is yet to come! The Powerline adapters can be combined with every wired or wireless network. With the Eminent Powerline adapters you can position your wireless router wherever you have the best reach. Great if you like to use a wireless notebook!

If you like to share your broadband Internet connection with several users at the same time, then you need to have a (wireless) router. Connect a Powerline adapter to this router. Connect a Powerline adapter to every pc that needs to be connected. You easily connect the Powerline adapter to your pc's network adapter with the enclosed UTP cable. Could it be easier?

The Powerline can also be used with Apple Mac, Linux, Playstation, XBox and any other device with a network port.

The Powerline adapter is an energy-saving device, and uses only 2 watts of power average. When not using the Powerline adapter, it will switch to power-save mode. In power-save mode, the Powerline device saves you up to 50% power!

BOX CONTENTS

- 2x EM8018
- 2x UTP cable
- 1x Manual
- 1x CD-rom
